PROJECTS

Eventra — Event Management Platform

GitHub | Demo

- Developed a professional full-stack campus event management and ticketing platform using React, Node.js, Express.js, and MongoDB.
- Implemented real-time seat availability tracking, integrated payment checkout, and secure offline QR-code ticket generation.
- Built a premium Admin Dashboard featuring dynamic data analytics and a live camera-based venue check-in ticket verifier.
- Hardened application security with unique database indexing, input validation, and robust seat capacity delta calculations.

Prescripto — Doctor Booking Platform

GitHub | Demo

- Developed a full-stack doctor appointment booking platform using React, Node.js, Express.js, and MongoDB.
- Implemented robust features including doctor profile listings, appointment scheduling, and search filtering.
- Designed a responsive, professional medical-grade UI with dynamic data handling and seamless user experience.
- Engineered backend REST APIs to handle patient data and availability slots securely.

Link-Tree — Bio Links

GitHub | Demo

- Created a personal link aggregator application that centralizes social profiles and important links onto a single page.
- Implemented a visually striking, mobile-responsive Glassmorphism design using modern CSS.
- Built the application logic and routing utilizing JavaScript, Node.js, and Express.js.
- Streamlined the user experience for one-click sharing and optimal cross-device rendering.
